
UE LABS

Testing, certification & product validation network

Nuria Bas

UE CS&Q Director & Labs Director

Life Is On

Schneider
Electric

UE Labs at a glance

Three local manufacturing-plant laboratories supporting validation, certification and quality.

3

Labs

Sarre-Union, Molins de Rei
and Capellades

7

Lab Employees

5 lab technicians, 1 Test & Expert Leader and Lab
Manager

3012

Tests done in 2021

1

Lab accredited by UL since 1999

One lab in each manufacturing plant: Sarre-Union, Molins de Rei &
Capellades.

Capellades Lab is CTDTP by UL since 1999, File number DA307

Where UE Labs fits in Schneider Electric

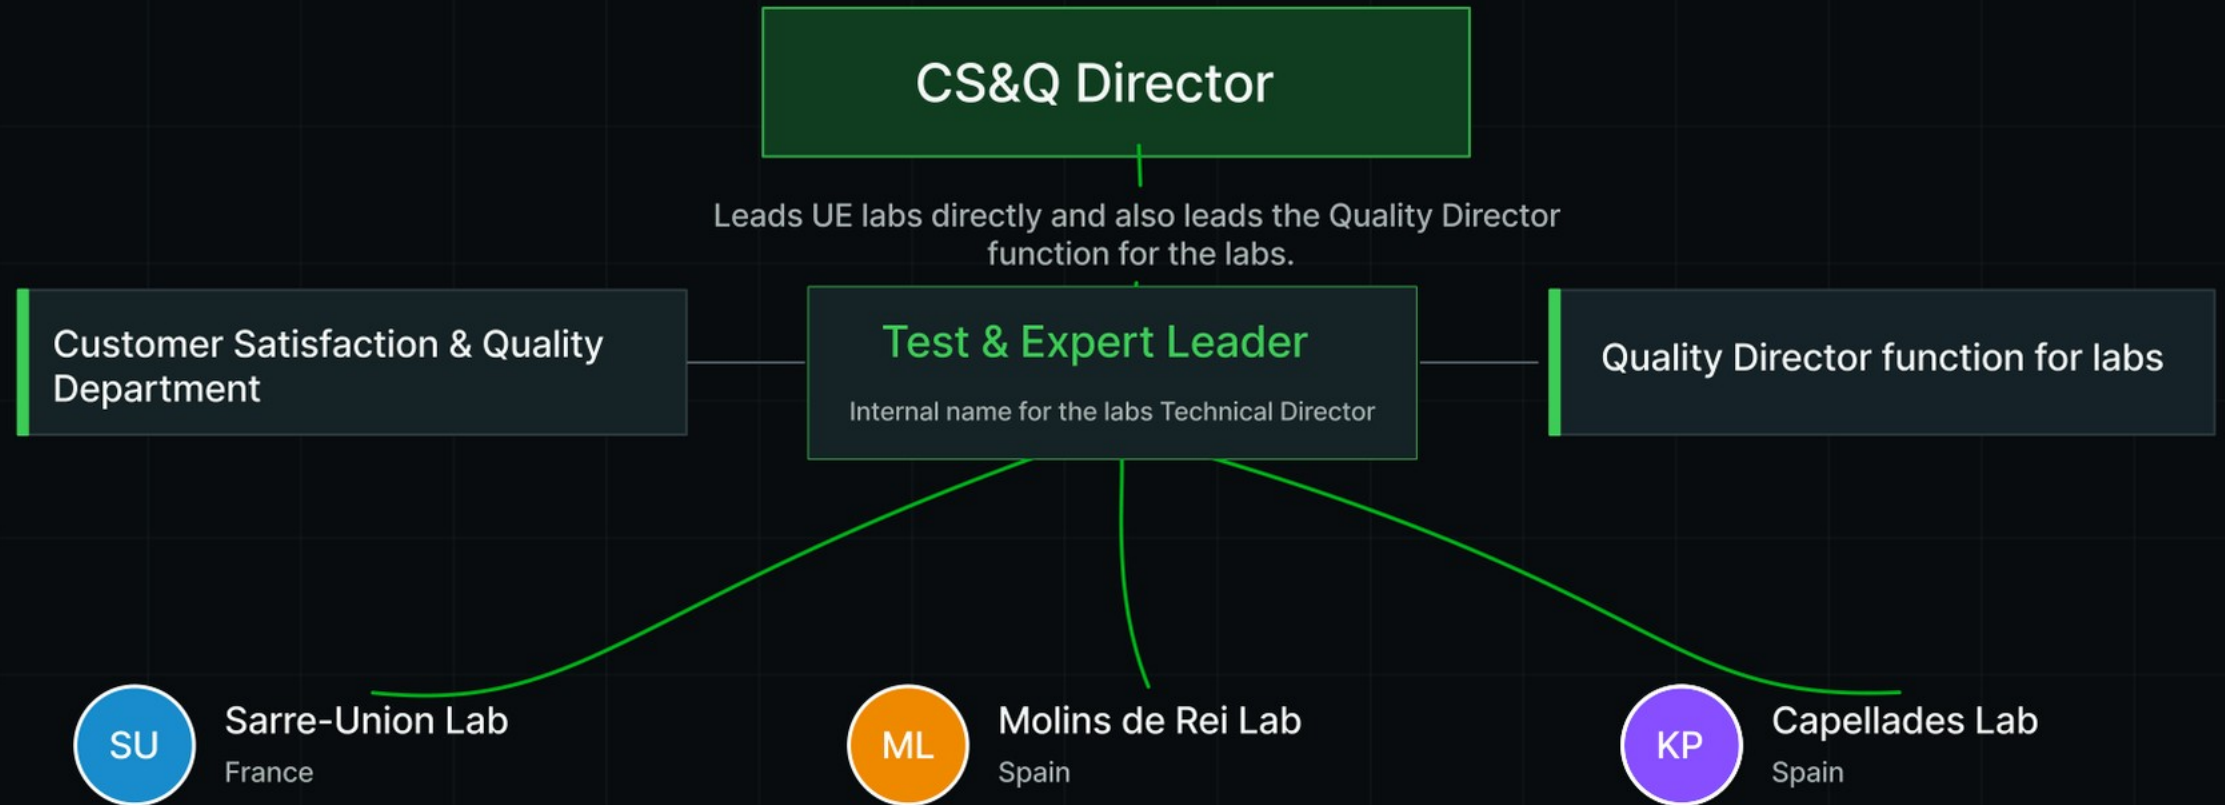

Universal Enclosures LoB is inside the Energy Management business structure.

Energy Management → Power Systems & Services → ETO → Universal Enclosures → UE Labs

UE Labs governance model

Universal Enclosures Lab sits inside Customer Satisfaction & Quality Department.

Mission

Seven operating responsibilities rebuilt as a validation value chain.

01 | Assure the quality of the standard of production

02 | Ensure qualification of product evolutions or new products launch

03 | Ensure certifications tests, including 1 UL accredited Lab

04 | Validate P&S specific solutions

05 | Analyse returns, RTA and TEX

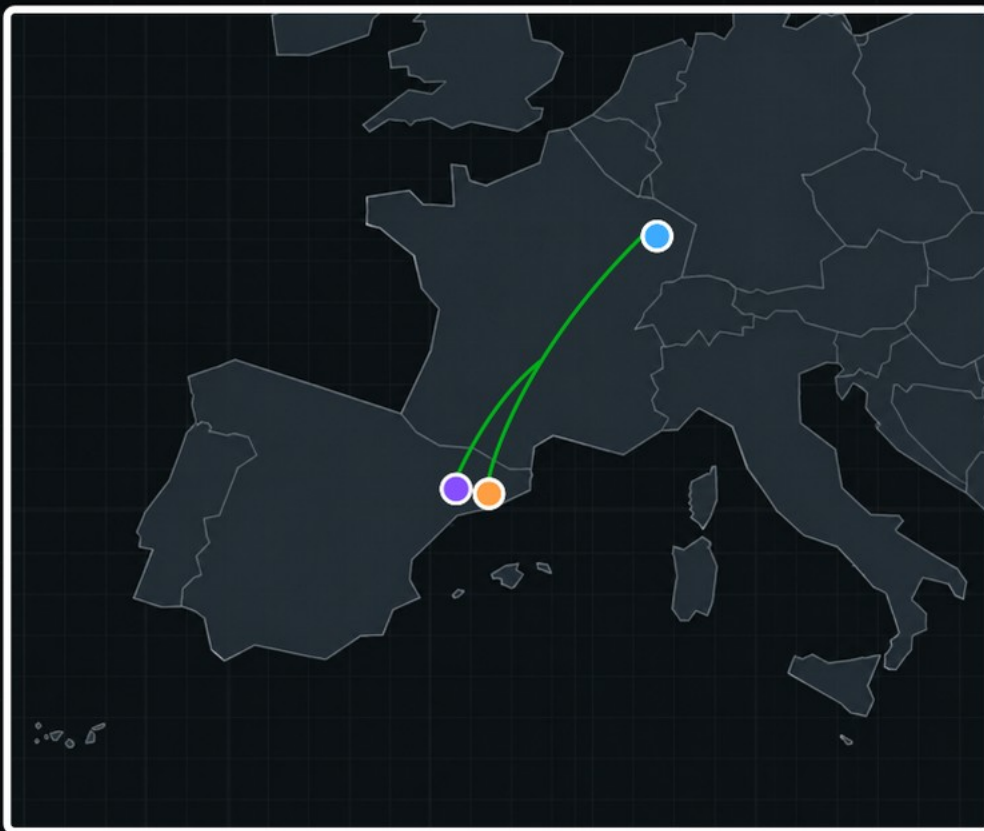

06 | Give support to the Customer Technical Support team

07 | Manage the calibration of labs & plants equipment

UE Labs connects production quality, certification readiness and product validation.

Three-lab network

UE Labs network: SU, ML and KP across France and Spain.

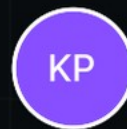

Local labs, shared validation network

Sarre-Union Lab
France

Molins de Rei Lab
Spain

Capellades Lab
Spain

UE Labs network: SU / ML / KP

Capellades Lab

UL CTDTP since 1999

File number DA307

Tests according to UL Standard can be performed with total autonomy and direct recognition of Underwriters Laboratories Inc.

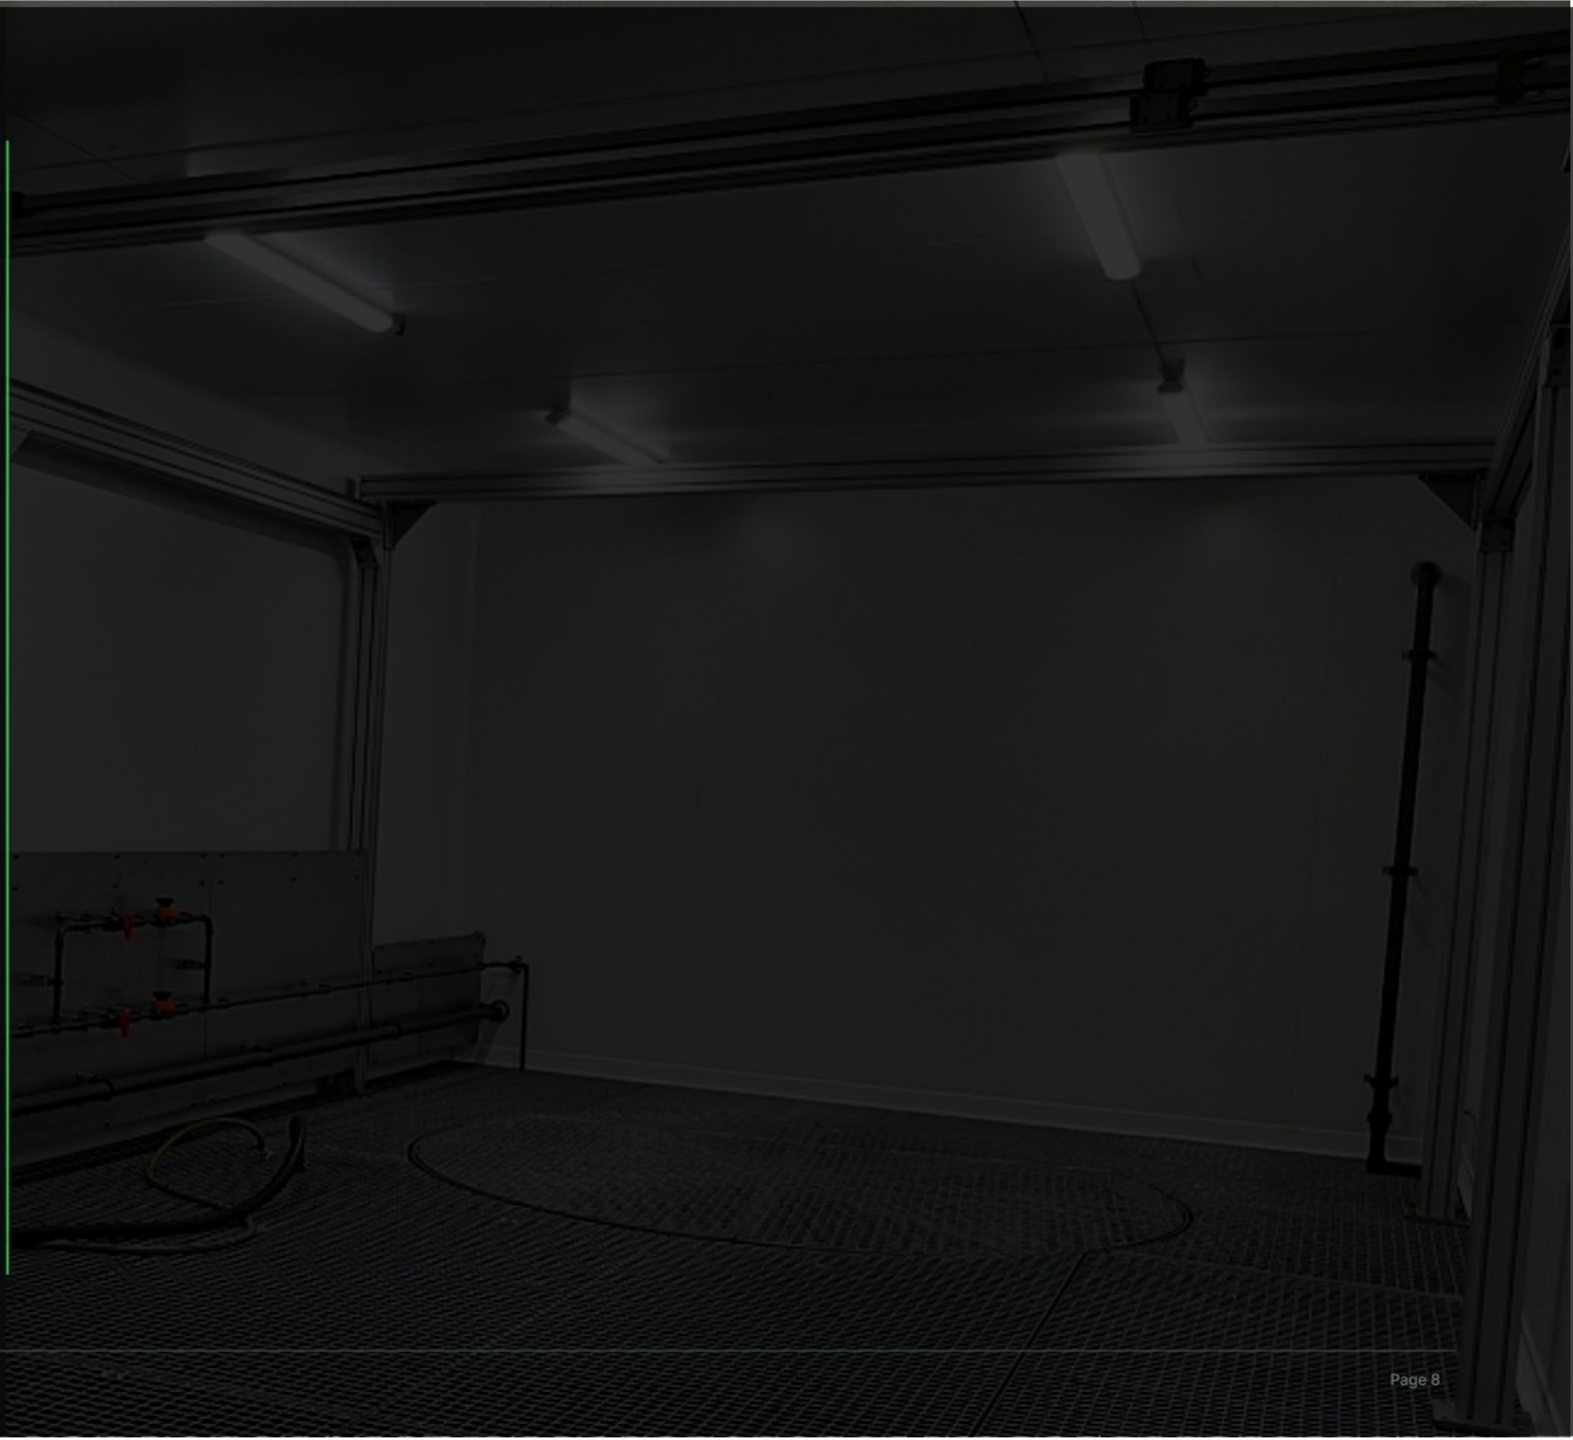

SU | FRANCE

Sarre-Union Lab

Part of UE Labs network

Sarre-Union Lab
France

ML | SPAIN

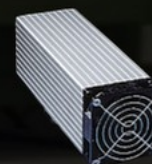

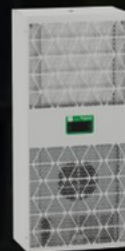

Molins de Rei Lab

Part of UE Labs network

Molins de Rei Lab
Spain

ClimaSys products

Standards & certification scope

Original standards rebuilt as a capability matrix by lab.

Capellades Lab is CTPD by UL since 1999, File number DA307.

Tests according to UL Standard can be performed with total autonomy and direct recognition of Underwriters Laboratories Inc.

UL / CSA recognition remains attached to KP in the matrix.

Products tested

Types of Products Tested: Spacial, Thalassa and ClimaSys portfolios.

Spacial

Steel and stainless steel

Thalassa

Plastic and glass-reinforced polyester

ClimaSys

Thermal management systems

Product families / environments

Spacial, Thalassa and ClimaSys enclosures and thermal management solutions are the **world's best choice** for equipment protection in any type of environment.

Industrial protection

Protection for equipment in demanding industrial settings

Material resistance

Steel, stainless steel, plastic and glass-reinforced polyester

Thermal management

ClimaSys systems for heat and enclosure performance

Enclosure reliability

Validation focus across environments and use cases

UE LABS

Testing confidence. Certification readiness. Product quality.
